SUMMARY

Senior product engineer with 9+ years building high-performance web products for Canadian and American enterprises and startups. Verified Toptal expert since 2021, specializing in Next.js, React, TypeScript, and Node.js. Combines an AI-augmented development workflow with rigorous engineering discipline, consistently shipping products built for speed, scalability, and accessibility.

WORK EXPERIENCE

Front-End Developer

2026 – Present

ComfyUI *Contract via Concreo*

- Improve and maintain the marketing site for a generative AI infrastructure company focused on node-based UI tools and community-driven AI workflows.
- Build and maintain features in ComfyUI's complex, high-performance web application for node-based AI workflows.
- Ship responsive, accessible front-end experiences across the marketing and product surfaces.

Tech: Vue 3, Astro, PayloadCMS, TypeScript, CodeRabbit, Tailwind CSS, CustomerIO, Supabase, PostgreSQL, GCP

Senior Frontend Developer

2024 – 2026

TakeUp LLC

- Built product UI for an AI-powered pricing platform used to manage room rates for hotels, boutique hotels, and B&Bs.
- Developed front-end features with React, Next.js, shadcn/ui, and Server Actions to support complex pricing workflows.
- Integrated authenticated product flows using Clerk, including user and organization-based access patterns.
- Connected front-end experiences to Python/FastAPI backend services for pricing logic and AI-powered functionality.
- Partnered with senior engineers in a high-autonomy team to ship features across the UI and support backend-driven workflows.

Tech: React, Next.js, TypeScript, Highcharts, Clerk, Node.js, CSS

Full-Stack Developer & Co-Founder

2021 – Present

Concreo Solutions Inc.

- Founded Concreo.io to provide businesses with an unparalleled web presence, substantially increasing client engagements and brand reputation.
- Oversaw development and deployment of digital solutions, enhancing client satisfaction and business outcomes.
- Pioneered strategies ensuring lightning-fast load times, improving bounce rates by 20%.
- Architected a high-availability infrastructure achieving 99.95% uptime during peak traffic.
- Led a team of experts fostering a culture of innovation, dedication, and client-centric delivery.

Tech: React, Vue, Nuxt.js, Next.js, Svelte, Firebase, Tailwind CSS, PostgreSQL, MySQL, Laravel, AWS Amplify, GCP, Vercel

Full-Stack Developer

2024 – 2026

humanly.io *Fixed-price Contract via Concreo*

- Built and maintained a multi-page marketing website using Next.js, Sanity, Tailwind CSS, and shadcn/ui.
- Implemented reusable UI components improving consistency and speeding up future page updates.
- Integrated Sanity CMS so non-technical teammates could update copy and content without code changes.
- Delivered polished, animated front-end experiences with an accessibility-first approach.

Tech: Next.js, React, Sanity Studio, Tailwind CSS, Shadcn, Resend**Full-Stack & 3D Developer**

2022 – 2023

Wearesky.com *Fixed-price Contract via Concreo*

- Crafted a 3D-centric user interface using Nuxt.js, Three.js, and GSAP, setting the website apart in its niche.
- Built responsive 3D designs that rendered flawlessly across diverse screen sizes, increasing mobile interactions.
- Constructed a library of reusable Vue components tailored for 3D applications, streamlining future development.

Tech: Vue 3, Nuxt.js, Three.js, GSAP, Tailwind CSS, Contentful, Google Analytics 4**Front-End Developer**

2022

Teamable *Fixed-price Contract via Concreo*

- Developed and launched a streamlined user interface using Next.js, enhancing UX and site performance.
- Designed intuitive web pages with Tailwind CSS, resulting in a 20% increase in user engagement.
- Enhanced accessibility ensuring WCAG compliance and optimized codebase for a 15% performance improvement.

Tech: Next.js, React, Tailwind CSS, NestJS, Google Analytics 4**Front-End Developer**

2021 – 2022

Grics *Fixed-price Contract via Concreo*

- Crafted a comprehensive suite of reusable components for an internal admin dashboard, ensuring UI consistency.
- Authored automated tests with Jest and documented components within Storybook for developers and stakeholders.

Tech: Vue 3, Nuxt.js, Vuetify, Jest, Storybook, Azure DevOps**Full-Stack Developer**

2020 – 2021

Takeln *Fixed-price Contract via Concreo*

- Developed a robust, scalable back end handling simultaneous food orders and integrated secure Stripe payment gateways.
- Refactored substantial portions of the codebase, enhancing system performance and maintainability.
- Navigated complex NoSQL database architecture managing users and orders at scale.

Tech: Nuxt.js, Vue, Firebase, Stripe, Node.js, TypeScript, Docker

Product Manager & Front-End Developer

2019 – 2020

Zum (Zumrails.com)

- Contributed to defining the product roadmap based on company strategy, market research, and analytic data.
- Built the front end and interfaces, defining and implementing metrics related to the product strategy.
- Collected and analyzed qualitative and quantitative customer feedback to drive decisions.

Tech: Vue 3, Nuxt.js, Tailwind CSS, Figma, i18n

Product Manager

2019

Flinks

- Defined the product vision, roadmap, and growth opportunities; led planning of product release plans.
- Managed the product features backlog, iteration planning, and user story elaboration.

Tech: Aha!, Figma, Research, Bootstrap

Business Intelligence Analyst

2017 – 2019

CGI

- Identified business needs and developed reporting dashboards in Tableau and Power BI.
- Developed scenarios and sensitivity models to recommend options for strategic initiatives and predict financial outcomes.

Tech: Tableau, Power BI, Microsoft Dynamics CRM, SQL
